PERSONAL PROJECTS

Project 1: E-Commerce website with Wordpress

[Website](#)

- Uses Nginx as Webserver on an Ubuntu VPS.
- Uses MariaDB as database.
- REST API to serve weather informations built with Nodejs, Expressjs and Nginx as ReverseProxy.
- SSL Certificates installed with Certbot (with automatic renewal).
- Added extra HTML, CSS and Javascript to further customize the website.

Project 2: Discord Bot

[GitHub](#)

- Built on Nodejs, DiscordJs - Written in Typescript.
- Uses GoogleSheetsAPI as database for players's minigames records, etc..
- Able to play Youtube's audio through voice chat with DisTube.js
- Interact and retrieve data from external servers (ex: my private Minecraft server).
- Built with proper Commands and Errors Handlers for scalability and reliability.

Other projects (No longer available)

- Personal Mailserver with CyberPanel.
- A WebApp to display real-time CryptoCurrency data.

EXTRA-CURRICULAR ACTIVITIES

- Play guitar in a small band.
